

WHA Super Safety Break-In Process

MP5 / SP5 / AP5 Platform (9mm Only)

1. Fire 500 rounds using the factory trigger group (NO Super Safety installed).
2. Use quality 124gr SAAMI/NATO-spec ammunition only.
3. DO NOT use a suppressor during break-in.
4. Install the WHA Super Safety lower.
5. Fire 100 rounds in semi-auto mode.
6. Fire 100 rounds in Super Safety mode.
7. After this process, burst fire and mag dumps are acceptable.

AR-15 Platform Guidelines

- Rifle calibers supported: 5.56, .223, 300 Blackout (NO .308 or larger).
- Pistol calibers supported: 9mm, 10mm, .45 ACP.
- Must use a low-shelf lower receiver.
- Full-auto bolt carrier group required for proper cam actuation.

Important Notes

- Super Safety systems are NOT compatible with .22LR platforms.
- Always verify host firearm brand and configuration before installation.
- When in doubt, contact WHA before installation.
- Proper break-in ensures reliability and long service life.
